

MSR-2 Upgraded Adjustable Tiller Extension

- **Save 30% compared to an alternative market leader.**
- **Precision engineered.**
- **A user experience like no other with enhanced performance.**
- **Easy to adjust whilst keeping your eyes on the water.**

Designed for tiller driven yachts 19ft and bigger, the MSR-2 Adjustable Tiller Extension provides outstanding control, precision and comfort.

The lightweight aluminium anodised body is stylish, and its strength ensures positive feedback from the tiller. The stainless steel connector is made of marine grade 316 stainless steel and offers maximum movement and flexibility whilst maintaining a bullet-proof reputation. The removable stainless pin also allows quick removal when not in use, providing additional security. It is fitted with an ergonomic handle with a soft foam grip enabling it to be used comfortably for hours, with or without gloves.

A key feature of the MSR-2 is the pull trigger which allows for adjustment of the extensions length. Being a pulling action, the helmsman can make rapid changes to its length one-handed, leaving one hand free.

- Available in five lengths (details below).
- Detachable fast pin to remove the extension from the boat when not in use.
- Bullet-proof stainless steel swivel.
- Pull finger action for one handed use, both extending and retracting.
- Soft ergonomic handle.
- Proven robust design.
- Smooth telescopic action.

Features

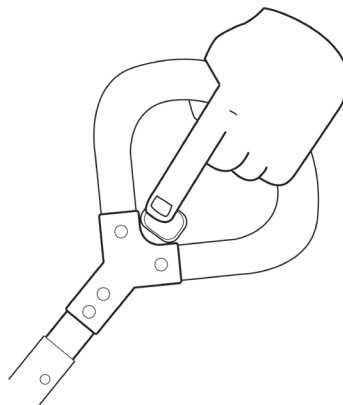

Fig A.

Generous foam grip handle with a pull trigger adjustment which makes sailing much easier and more comfortable.

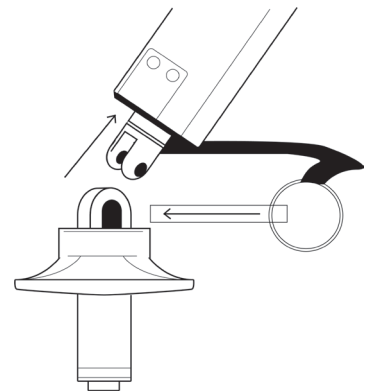

Fig B.

Rubber buffer to prevent handle dropping tiller.

Product Code	Length (cm)	Weight (g)
