

Kevlar Camcleats

R3623 Small & R3663 Medium Cams

R3623 & R3663 Small & Medium Cams

Manufactured with high performance materials and a redesigned spring mechanism, these unique and innovative Kevlar cams exhibit improved holding power and durability while remaining surprisingly lightweight.

RWO Kevlar Camcleats feature:

Kevlar Jaws

The R3623 and R3663 feature Kevlar jaws for unrivalled strength and wear resistance on modern lines

Improved Bearings

PTFE self-lubricating, scalloped bearings that minimise friction and reduce the need for maintenance

New Leaf Springs

New leaf springs have been especially designed to ensure consistent spring tension and rope holding.

Installation Packs - with Fairlead & Wedge Kit

Both small and medium cams also come on our newly branded retail packs along with a fairlead and wedge kit. The wedge kit allows for installation at an angle of 10, 20 or 30° for improved leads and includes underdeck angled packers for through deck fastenings.
